

③

Example of log processing function:

topK_sourceIP(int hour);

Given data consideration if both functions are important, then rewrite the program follows:

Here Group the "scrIP" and "refTime" fields into a separate array to improve the overall performance

④ Example of log processing function:

topK_sourceIP(int hour);

Given data consideration if both functions are important, then rewrite the program follows

Here Group the "scrIP", "refTime" and "status" together to improve the overall performance
